

OKLAHOMA STATE UNIVERSITY

College of Arts and Sciences

SCHOLARSHIPS

Arts and Sciences freshmen are eligible for scholarships offered through the university and the OSU Foundation. In addition, after completing work at OSU with a GPA of 3.5 or above, full-time continuing students may compete each February for one of 35-40 Arts and Sciences scholarships awarded for the following year. Please visit the College of Arts and Sciences website to find out more information about available scholarships.

INTERNSHIPS

Most departments in the college strongly encourage or require students to participate in an internship or other career-related work experience. Arts and Sciences students have completed internships at:

- The Federal Bureau of Investigation
• The Screen Actors Guild Foundation
• Legal Aid Services
• The Deutsche Oper Berlin
• The Gilder Lehrman Institute of American History

UNDERGRADUATE DEGREES

- American Studies
Art
Art History
Studio Art
Graphic Design
Studio
Biochemistry
Biological Sciences
Botany
Chemistry
ACS Approved
Departmental Degree
Communication Sciences & Disorders

- Computer Science
Economics
General
International Economics Relations
English
Creative Writing
Screen Studies
Professional Writing
French
Geography
Geology
German
History
Journalism & Broadcasting
Advertising
Broadcast Journalism
News-Editorial Journalism
Public Relations

Liberal Studies

- Mathematics
Microbiology/Cell & Molecular Biology
Biomedical Science
Clinical Laboratory Science
Microbial Ecology/
Environmental Science
Microbial Pathogenesis
Molecular Genetics
Music
Elective Studies in Business
Performance
Music Education
Instrumental/Vocal Certification
Philosophy
Physics
Applied Physics
Physiology
Political Science
Psychology
Russian Language & Literature
Sociology
Anthropology
Applied Sociology
Spanish
Statistics
Theatre
Acting
Design and Technology
Zoology

In 2008, Jaclyn Cosgrove was named one of "the 100 best student journalists" in the country by UWire, a student-powered wire service and student membership organization. Studying journalism, the Arpelar, Okla., was editor-in-chief of the OSU student newspaper, the Daily O'Collegian.

"I take my job as a journalist very seriously," Cosgrove said. "I've seen the impact your words can have ... I've seen the good things journalism can do."

UWire staff say honorees were selected "for their potential to shape the media industry in the years ahead."

More than 500 students from 130 colleges and universities were nominated for the UWire honors.

OKLAHOMA STATE UNIVERSITY

College of Arts & Sciences

LIVING AND LEARNING COMMUNITIES

New students have the opportunity to participate in living and learning communities where those with similar interests and goals live in common housing units and take several courses together during their first year at OSU. Living learning options under Arts and Sciences include Computer Science House, Health and Sciences House, History House, Journalism and Broadcasting House and Spanish House.

DEPARTMENTAL CLUBS AND HONOR SOCIETIES

More than 75 clubs and honor societies provide ample opportunities for Arts and Sciences students to get involved in activities related to their academic interests. Every department is represented by at least one student organization. A few examples of clubs and organizations are: Advertising Club, American Medical Student Association, Botanical Society, Creative Writers Association, Russian Club and University Advertising.

RESEARCH

The college's research areas are as diverse as its disciplines and sciences, ranging from research in smoking cessation to how gender affects perceptions of competency. Also, the college physics department operates Oklahoma's largest and most advanced telescope.

OSU physics professor Girish Agarwal is an international leader in quantum optics research, and he has some impressive new credentials to prove it. The Fellowship of the Royal Society, the United Kingdom's elite academy of scientists, recently elected Agarwal Fellow - the highest honor a scientist can receive next to the Nobel Prize. Membership in the Royal Society places Agarwal among the world's best scientists, engineers and technologists, including 21 Nobel Prize winners and such luminaries as Isaac Newton and Albert Einstein.

FACILITIES

There are many hands-on classrooms and labs available in A&S such as the broadcast communications video editing lab, theatre costume design lab and set construction lab, multiple art studios and the Gardiner Art Gallery, as well as numerous labs for scientific research including a robotic telescope funded by a grant from the Air Force Office of Scientific Research.

FAST FACTS

- The College of Arts & Sciences is home to approximately 4,800 undergraduates and more than 800 graduate students, making it the largest college at Oklahoma State University.
- A&S includes more than 80 degree options.
- Talented students can interact with faculty in research and creative activities, giving them hands-on experience in their disciplines.
- A&S Career Services Office provides help both before and after graduation in making sure your collegiate experiences are presented in the best possible manner on your résumé or professional school application.
- A&S is an affiliate of the prestigious Newberry Library Center for Renaissance Studies. OSU is the only university in Oklahoma to be a member and is one of 46 members internationally belonging to the Newberry Consortium.
